

Team-name: Crew X

Team-leader : Vidhisha Maken

Project Name - Sankalpa

Track: Social cause

MLH Tracks: Github, Auth0, Twilio

Our project is a website for connecting people to welfare causes. It provides a platform for people who want to volunteer in NGOs and other welfare organizations. Our website would also contain authentic ratings and reviews(entered by users) about NGOs and would help users track NGOs near them. It would also act as a platform for users to make donations to these organizations. People can also join these NGOs through our platform.

Our vision is to build a community that connects people who want to help and those who need it.

We will use HTML,CSS,Javascript ,Google map API , PHP ,MySQL for our project.
